

November 2020

It's Almost Over!

November 30 marks the end of the Atlantic Hurricane Season. LWDD wants to thank our residents, community leaders and property managers for their cooperation and response to flood control communications. It take all of us to provide quality food control. Learn more about community flood control at our website.

Operable Vs. Non-operable Community Structures

LWDD allows two types of discharge control structures - Operable and Non-operable. Each type functions to provide flood control for communities and businesses within our boundaries, but what is the difference between them?

Read more to learn about these important drainage devices.

LWDD's Rehabilitation Program

The increasing frequency and intensity of our hurricanes, tropical depressions, and thunderstorms requires more than ever the rehabilitation of LWDD's canals and rights-of-way. LWDD established its Canal Rehabilitation Program to facilitate effective flood control for public safety. Watch and learn how the canal rehabilitation program benefits homeowners.
