

## Public Advisory

### You're Invited to Join Our Test Group for New DBHydroInsights System

*Click on the image to watch a video about DBHydroinsights.*

As part of the South Florida Water Management District's (SFWMD) ongoing efforts to expand transparency, public access and engagement, you are invited to volunteer to help us test a new program we will launch next year called [DBHydroInsights](#). DBHydroInsights will expand the public's access to the water quality and other data used by SFWMD to make water management decisions.

***The public is invited to sign up to volunteer to take part in our beta testing focus group to help test out [DBHydroInsights](#) at [SFWMD.gov/insights](#). [DBHydroInsights](#) is a map-based interface into the District's vast amount of hydrologic and water quality data.***

Volunteers will be asked to:

- Join periodic calls with SFWMD staff,
- Spend at least 30 minutes a week in the new system,
- Provide feedback to SFWMD on improvements,
- Learn more about water management in South Florida, and
- Participate now through April 2021.

After it officially launches in 2021, **DBHydroinsights** will provide quick access to current levels of major lakes in South Florida as well as flow gauge

readings and other data on water control structures, stormwater treatment areas and all the other major components of SFWMD's water management and flood control systems. The database also gives access to current and historical data on watersheds and other sites throughout South Florida.

---

***The South Florida Water Management District*** is a regional governmental agency that manages the water resources in the southern part of the state. It is the oldest and largest of the state's five water management districts. Our mission is to safeguard and restore South Florida's water resources and ecosystems, protect our communities from flooding, and meet the region's water needs while connecting with the public and stakeholders.
