To: Community Board Presidents

SUBJECT: HURRICANE SEASON IMMEDIATE ACTION REQUESTED

As we prepare for the 2021 Atlantic Hurricane Season, the Lake Worth Drainage District (LWDD) is requesting your assistance to ensure we have the most up to date contact information for your community.

The LWDD needs to know who has been designated by the Community Board as the responsible individual(s) for the maintenance of your drainage system and operation of the discharge control structure (aka: weir) in your pond/lake. Designated persons may be property managers, board members or residents. Operation of the discharge control structure is permitted only with prior authorization from the LWDD. Coordination between the LWDD and communities is vital to flood control.

The LWDD uses this information to verify who has the authority of the Community Board, and that they are receiving the LWDD's weather alerts and emergency instructions. It is important that this data is current, and the LWDD suggests Community Boards submit this information when there is a change in personnel, or at least once a year at the start of the storm season.

Do not delay. If you have not already done so, please submit your community's contact information online at: <https://www.lwdd.net/storm-response>.

If you have any questions, please do not hesitate to contact me, or visit our website at www.lwdd.net for information regarding community flood control.

Thank you for your cooperation.

Rosemary Rayman
