

The Slosberg Report

COVID-19 Updates

The COVID-19 Variant:

The highly transmissible B.1.617.2 (Delta) variant continues to spread at a rapid pace across the United States. With the increase in COVID-19 cases hospitals are at critical mass capacity. Recent data has shown that unvaccinated children and young adults account for more than 98 percent of COVID-19 hospitalizations according to the Department of Health - Palm Beach.

FDA Approval of the COVID-19 Vaccine:

The FDA has officially approved the first COVID-19 Vaccine. The Pfizer-BioNTech Covid-19 Vaccine was approved and will now be distributed as Comirnaty. The vaccine has been approved for those 16 years of age and above, and emergency use authorization (EUA) continues for individuals 12 to 15 year olds. Based on the clinical trails the vaccine was 91 percent effective in preventing COVID-19 according to the FDA.

It has been decided by the Biden Administration that as new cases of Covid-19 surge most Americans should receive a Coronavirus vaccination eight months after they received their second shot. Currently, CDC is recommending that moderately to severely immunocompromised people receive an additional dose. coronavirus booster vaccination. As additional does have been granted emergency authorization by the FDA for those who immunocompromised.
