

### **Lyons Road Update May 23, 2024**

The County Engineer's office has been asked to send regular updates on the Lyons Road widening project between the LWDD L-38 Canal and Atlantic Avenue. Like we mentioned below, the current work at the intersection of Atlantic Avenue and Lyons Road requires a traffic shift and you may have noticed that while driving through that intersection.

Over the past several nights, the contractor has been paving the intersection of Atlantic Avenue and Lyons Road. On the morning of May 23rd, the contractor completed the traffic shift for southbound Lyons Road traffic.

In the coming weeks, motorists can expect similar construction activities at the corners, now shifting to the new work zone in the middle of Lyons Road. The contractor will be installing concrete medians, base rock, and asphalt on both the northbound and southbound approaches to Atlantic Avenue.

The contractor is still on track for July 2024 completion.

Thank you,  
Joanne
